Orestis Stampolos

JUNIOR IT ENGINEER | DIGITAL SYSTEMS STUDENT oreststamp04@gmail.com
| +30 6906854875 | Athens, Greece | linkedin | Github

SUMMARY

Digital Systems undergraduate at the University of Piraeus, passionate about IT infrastructure, cloud, and automation. Hands-on experience with Windows Server, Active Directory, and networking, plus Azure fundamentals (AZ-900, AZ-104 in progress), and a consistent home-lab builder who learns by doing. Finishing my academic studies and seeking a full-time opportunity to grow while learning from experienced professionals.

PROFESSIONAL EXPERIENCE

Vodafone Greece Apr 2026 – June 2026

Network Security Operations Trainee (Academic Internship)

- Administered enterprise Linux and Windows Server environments, configuring secure automation protocols (SFTP) and handling account management workflows.
- Managed and escalated infrastructure alerts by analyzing affected systems and coordinating with senior engineers, applying TCP/IP, DNS, DHCP, VLANs, SSH, SNMP and TACACS+ knowledge in first/second-level incident troubleshooting.
- Conducted network scanning and asset discovery (BMC Discovery) and patch impact analysis for Linux kernel vulnerabilities, maintaining infrastructure visibility and supporting vulnerability management workflows.
- Supported SolarWinds platform update procedure, coordinating secondary-then-primary server maintenance with zero unplanned downtime — demonstrating structured approach to infrastructure upgrades and change management.

Food & Beverage / Construction (Part-time) 2022 – 2025

Server & Construction Assistant

- Demonstrated reliability, time management, and clear communication under pressure in customer-facing and team environments.

PROJECTS

On-Premises Active Directory Domain & Windows Server Administration May 2026

- *Deployed and administered a **Windows Server** domain controller on a virtualized lab (**VMware**) with **Active Directory**, configuring **DNS**, organizational units, and user accounts, and enforcing security and desktop policies across the domain via **Group Policy (GPO)**.*

Secure URL Shortener — Azure Cloud Architecture July 2026

- *Designed a network-isolated 3-tier application on **Microsoft Azure** using **VNet segmentation, NSGs, and private endpoints** to give the database zero public internet exposure, with password-free access via **Managed Identity** and **Key Vault**, and automated build/deploy through a **GitHub Actions** CI/CD pipeline to Azure App Service.*

TECHNICAL SKILLS

Cloud & IaC:	Azure (IaaS/PaaS), Terraform fundamentals, Resource Provisioning
CI/CD & Tools:	GitHub Actions, Docker, Git
Systems:	Windows Server, Linux CLI, Basic Bash Scripting, Active Directory, GPO.
Networking:	TCP/IP, HTTP/S, DNS, DHCP, VLANs, subnets, SSH, SFTP, SNMP, TACACS+, Cisco Packet Tracer
Monitoring:	Azure Monitor, Log Analytics, SolarWinds, BMC Discovery, CVE Impact Analysis

CERTIFICATIONS & TRAINING

Microsoft Azure Fundamentals (AZ-900) Microsoft · 2026

Microsoft Azure Administrator (AZ-104) – ESI Training In progress · Hands-on labs

EDUCATION

University of Piraeus 2022 – Present

B.Sc. Digital Systems

- Relevant coursework: Computer networks, operating systems, cryptography, information security, programming.

ADDITIONAL INFORMATION

Languages: Greek (Native), English (Fluent / C2), French (B1)

Soft Skills: Self-directed learning, attention to detail, teamwork, problem-solving, clear technical communication
